

Jacob Sandau

Education

University of Minnesota, Twin Cities — B.A. Data Science, Minor Computer Science

Expected May 2027

Relevant coursework: Data Structures & Algorithms, Software Development, Database Systems, Linear Algebra, Regression & Statistical Computing

Skills

Languages: Python, Java, SQL, R, TypeScript

Frameworks: Next.js, Flask, Prisma, Pandas, Tailwind CSS

Tools: PostgreSQL, GitHub, Tableau (salesforce), UiPath (RPA), VS Code, R studio, Excel, Power BI

APIs: HubSpot, Groq, GroupMe

Projects

SiteIQ — AI Website Audit & Lead Funnel System

Next.js · TypeScript · PostgreSQL · Prisma · Groq (LLaMA 3.3) · Puppeteer · HubSpot API

Live demo: <https://ai-site-audit-production.up.railway.app/>

- Built a full-stack Next.js app that scrapes websites, runs AI analysis via Groq (LLaMA 3.3), and scores it across SEO, UX, conversion, performance, and content in under 60 seconds.
- Designed resilient scraping system using fetch with Puppeteer fallback for JavaScript-heavy sites and graceful failure handling.
- Engineered AI pipeline using Groq (LLaMA 3.3) with constrained JSON outputs for structured, consistent scoring across audits.
- Implemented a lead gating flow — preview shown free, full report unlocked after email capture — triggering automatic HubSpot contact and deal creation with audit context pre-populated.
- Deployed on Railway with Neon PostgreSQL, persisting audits, reports, and lead states for retrieval and CRM sync.

Fraternity Automated Grocery Request Bot

Python · SQL · Flask · GroupMe Bots API · scikit-learn · Tableau

- Built and deployed a Flask-based GroupMe bot collecting grocery requests from 40+ residents into a PostgreSQL database, eliminating a manual coordination process that took 30+ min/week.
- Implemented a SQL data pipeline aggregating historical grocery data and trained a LinearRegression model to forecast weekly needs, improving inventory planning accuracy.
- Created Tableau dashboards visualizing predicted vs. actual demand with actionable KPIs.

Experience

Mission Outdoor

Eden Prairie, Minnesota

Warehouse Associate

July 2023 - August 2023, May 2024 - August 2024

- Operated forklift machinery to transport, organize, and sort over a hundred different items daily.
- Used a meticulous system of IDs called 'SKUs' (Stock Keeping Units) to keep track of our inventory and memorized over a hundred of them for efficiency to meet our orders.
- Worked with 10+ other employees with picking, packing, and shipping nearly 300 orders a day in the span of 8-hour work days.
- Trained new employees on warehouse procedures and equipment operation, leading to an improvement in our efficiency of shipping and receiving.
